SUMMARY

MSc Data Science and Geoinformatics student at Digital University Kerala with expertise in Python, Machine Learning, Deep Learning, and predictive analytics. Experienced in applying data science and AI techniques to solve complex engineering challenges. Co-Founder of ZapServe Interconnecting Pvt. Ltd., combining technical expertise, analytical thinking, and entrepreneurial leadership to develop scalable, data-driven solutions for real-world applications.

EXPERIENCE

Co-Founder

ZAPSERVE INTERCONNECTING PRIVATE LIMITED

June 2025 – Present, Kollam, Kerala, India

- Co-founded ZapServe, a hyperlocal workforce marketplace, successfully developing and launching the MVP
- Secured company incorporation and established the legal, operational, and product foundation for the startup.
- Led the end-to-end design and development of the marketplace platform, from requirement gathering to MVP deployment.

PROJECTS

Credit Card Fraud Detection using Heterogeneous Graph Neural Networks (HGNN)

Leveraged logical and innovative problem-solving to build a heterogeneous graph neural network-based fraud detection system, achieving 96.6% accuracy in identifying complex financial transactions.

AI-Powered Geospatial Feature Extraction System

Applied analytical and innovative thinking to develop a deep learning-based feature extraction framework using YOLO, OpenCV, and PyTorch, optimizing the detection and analysis of geospatial features in remote sensing imagery.

GeoSI – Conversational AI System for Multi-Step GIS Workflow Automation

Developed an innovative AI-powered geospatial intelligence platform, applying analytical methodologies to integrate LLMs, RAG, and GeoAI for automating complex, multi-step GIS workflows.

EDUCATION

MSc Data Science and Geoinformatics

Digital University Kerala • January 2026

BS Geology/Earth Science, General

University of Kerala, Thiruvananthapuram • 2021-2024 • 7.2

CERTIFICATIONS

Google Cloud Data Analytics Certificate

Google • 2026

- Demonstrates proficiency in data analytics, data visualization, SQL, spreadsheets, and business intelligence concepts.
- Developed skills in data cleaning, transformation, analysis, and reporting.
- Applied analytical techniques to extract insights and support data-driven decision making.
- Relevant to Data Science, Data Analytics, Business Intelligence, and Cloud-based data workflows.

SKILLS

Python, SQL, C++, Linux, Git, GitHub

Machine Learning, Deep Learning, NLP, Computer Vision, Graph Neural Networks, LLMs, RAG, Agentic AI, Multi-Agent Systems, Prompt Engineering

PyTorch, TensorFlow, Scikit-Learn, Hugging Face Transformers, LangChain, LangGraph, LlamaIndex

PostgreSQL, Neo4j, FAISS, ChromaDB, Redis, PostGIS

Docker, Kubernetes, FastAPI, REST APIs
